ADVANCED TRAINING IN MODERN REACT

CURRICULUM OVERVIEW

STEP BY STEP

SCHEDULE

WEEK 1 JS

Javascript fundamentals (scopes, blocks, event loop, ES5 vs ES6 differences)

WEEK 2 JS

Javascript fundamentals
(Ecosystem, webpack /
transpilers, npm, promises)

WEEK 3 REACT

React (why react, differences
from vanilla js, state, props,
class components)

WEEK 4 REACT

React (CSS / SCSS styling,
functional components, hooks,
custom hooks, design patterns)

WEEK 5 NODE JS

NodeJS (Http, routing, requests, mock api)

WEEK 6 EXPRESS

ExpressJS (Routes, middlewares, simple hosting mechanisms, and any ORM)

WEEK 7 MONGO DB

MongoDB (tables, interfaces with Node, drivers on express app)

WEEK 8 EXERCISES

Start on personal project along with students

WEEK 9 FINAL ASSIGNMENT

Student personal project as final assignment

WEEK 1

1. JAVASCRIPT FUNDAMENTALS

- Code scopes
- Code blocks
- Javascript event loop
- ES5 vs ES6

WEEK 2

2. JAVASCRIPT FUNDAMENTALS (CONTINUED)

- Javascript Ecosystem
- Babel & Webpack
- NPM (package management)
- Promises
- Async / Await

WEEK 3

3. REACT

- Why React
- Differences from Vanilla JS
- State
- Props
- Class components
- Component Lifecycle

WEEK 4

4. REACT (CONTINUED)

- CSS and interpreted CSS (SASS)
- Functional Components
- Hooks
- Custom Hooks
- Design Patterns

WEEK 5

5. NODEJS

- HTTP
- Routing
- Requests
- API's
- Mock API creation

WEEK 6

6. EXPRESS JS

- Routes
- Middlewares
- Hosting and server-side
- ORM and connections

WEEK 7

7. MONGO DB

- Tables
- Interfaces with NodeJS
- Other drivers w/ Express

WEEK 8 & 9

STUDENT PROJECT BUILD & FINAL PROJECT ASSESSMENT

The last 2 weeks will include

- Starting a project along with students
- Students starting a project on their own as a final task for the course
